

Greenwich Community Directory

Online gateway to care and support

The Greenwich Community Directory is an online resource offering local residents access to information on social care, health, wellbeing and advice services in the Royal Borough of Greenwich.

The integrated directory serves as a single point of information and advice on services to help people to live well in Greenwich.

The Directory is aimed at Greenwich residents who want to improve their own health, or who are isolated or vulnerable. It is also geared to anyone who wants advice on getting involved in activities to improve their wellbeing or to help them become more involved in their local community. It also offers support to carers, family, friends and those acting on behalf of vulnerable people.

The Directory lists council and NHS services alongside those provided by local voluntary organisations. It also links directly into the online NHS Choices service, allowing residents to find their nearest GP, dentist or pharmacy.

Local voluntary organisations have been trained to support residents – particularly those without access to a computer, or who lack online confidence - in getting the best out of the Directory.

The Greenwich Community Directory is designed to help people maintain their independence and wellbeing by giving them easy access to a huge array of services, support and activities across the borough. They can also find out if they qualify for some extra support and build plans to help to improve their quality of life.

There is a rich mix of advice and support services available in the borough, and the Directory aims to help ensure that the people who could benefit most from that support, are aware of what's on offer.

The Directory has recently been expanded to allow residents to complete an online referral form to help establish their level of need for social care and build a Wellbeing Plan online, identifying their health and wellbeing goals. They'll be able to use this to connect online to services that will help them to meet those goals and will enable them to construct a shortlist of services.

The screenshot shows the homepage of the Greenwich Community Directory. At the top, there is a navigation bar with links for Home, Categories, News, What's On, Help, and Contact. A search bar is prominently displayed with fields for Categories, Keyword(s), and Location. Below the search bar, there are several colorful tiles representing different service categories: Help at Home (purple), Health & Wellbeing (pink), Supported Living & Housing (green), Things to Do & Getting There (orange), Carers (teal), Advice & Benefits (blue), Training & Employment (red), and Staying Safe (dark blue). A red banner at the bottom of the main content area says "Start Your Self-Assessment Find the best support for you". Four callout circles at the bottom of the image point to specific features: the first points to the News link, the second to the Advice & Benefits tile, the third to the Search button, and the fourth to the My Shortlist button.
